WHAT YOU BUY — AND WHAT YOU GET

You are buying roses to get an abundance of cut flowers. To have that you must begin with "root strength" quality plants, such as we are known to furnish. Bear in mind that if you purchase rose bushes from various sources, they look the same. But what a difference when they begin to bloom! Rose bushes with a low vitality take up just as much room in your garden as our strong root plants, and require just as much cultivation, fertilizer, etc., so why not spend a few more cents per plant and get some real quality rose plants.
